

H O T T U B E Z S T A R T U P G U I D E

1. Fill your Hot Tub with the pre filter (Provided w/LX Series)---
Run the filter outside the tub for the 1st 30 seconds
To clear any sediment in the filter.

2. Balance PH with and Test Strips Test PH-----
The PH is usually high in our area.
Start with about , (1/2 for 7' tub -3/4 cup for 8') Spa Down.
TURN JETS ON HIGH. Wait 30 Minutes and retest and Repeat.

3. After PH is Balanced & the spa is heated to about 90 -----
Add 2 capfuls of the Enzyme Powder to the filter area
w/jets on high.

4. Next add the Sustain/Monthly to the filter area -----
every 30-45 days. This is a solution of natural
enzymes that will stabilize the ph and soften the water.

5. Add 1 packet of ONEshock to the tub as a sanitizer at ---
Start up.
Add 1-3 packets each time you exit the tub depending
on bather load & tub size.
Add at least 1 packet/ week.
